5. Management Discussion and Analysis

SECTION A

The entity's operational and financial performance

During the first quarter of the period the County Government had not disbursed any funds to the entity

SECTION B

Entity's compliance with statutory requirements

The entity has complied with all relevant laws and regulations and that there are no potential contingent liabilities

SECTION C

Key projects and investment decisions the entity is planning/implementing.

Most project for the previous financial year were completed during that financial year. During the financial year under review the entity to invest in key infrastructural activities including tarmacking of one Kilometre road as well as rehabilitation of feeder road within the Municipality. The project will be financed through allocation by the County Government and conditional grants from the World Bank under Kenya Urban Support programme II (KUSPII)

SECTION D

Major risks facing the entity.

Since the entity has not yet started borrowing funds from banking institutions there are no major risks. However the conditional grants from KUSPII programme has minimum conditions that have to be met before receipts of funds, and without meeting those conditions then there will be no allocation or the allocation may be reduced hence affecting the earmarked projects for implementation during the financial year.

SECTION E

Material arrears in statutory/financial obligations

There are no material arrears or financial obligation

SECTION F

The entity's financial probity and serious governance issues

There are no major financial improbity reported by any entity whether internal audit/ Board audit Committee, external auditors or any other Government Agencies and that there are no governance issues among board or board members and top management including conflicts of interest.

6. Statement of Management's Responsibilities

Section 166 of the Public Finance Management Act, 2012 requires that, at the end of each quarter, the Accounting Officer of the City/Municipality established by Urban Areas and Cities Act No. 13 of 2011 shall prepare financial statements in accordance with the standards and formats prescribed by the Public Sector Accounting Standards Board.

The Municipality manager is responsible for the preparation and presentation of the City/Municipality's financial statements, which give a true and fair view of the state of affairs of the City/Municipality for and as at the end of the period ended on Sept 30, 2024. This responsibility includes: (i) maintaining adequate financial management arrangements and ensuring that these continue to be effective throughout the reporting period, (ii) maintaining proper accounting records, which disclose with reasonable accuracy at any time the financial position of the City/Municipality, (iii) Designing, implementing and maintaining internal controls relevant to the preparation and fair presentation of the financial statements, and ensuring that they are free from material misstatements, whether due to error or fraud, (iv) Safeguarding the assets of the Municipality, (v) Selecting and applying appropriate accounting policies, and (vi) Making accounting estimates that are reasonable in the circumstances.

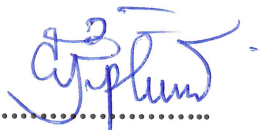

The Municipality Manager accepts responsibility for the financial statements, which have been prepared using appropriate accounting policies supported by reasonable and prudent judgments and estimates, in conformity with International Public Sector Accounting Standards (IPSAS), and in the manner required by the PFM Act, 2012 and *Urban Areas and Cities Act No. 13 of 2011*. The Municipality Manager is of the opinion that the financial statements give a true and fair view of the state of Municipality's transactions during the financial period ended June 30, 20xx, and the financial position as at that date.

The Municipality Manager further confirms the completeness of the accounting records which have been relied upon in the preparation of financial statements as well as the adequacy of the systems of internal financial control. In preparing the financial statements, the City/Municipality Manager has assessed the City/Municipality's ability to continue as a going concern and disclosed, as applicable, matters relating to the use of going concern basis of preparation of the financial statements.

Nothing has come to the attention of the Municipality Manager to indicate that the Municipality will not remain a going concern for at least the next twelve months from the date of this statement.

12. Notes to the Financial Statements

1. General Information

Kapenguria Municipality is established by and derives its authority and accountability from Urban Areas and Cities Act. The Municipality is under the West Pokot County Government and is domiciled in Kenya.

The *entity's* principal activity is to provide efficient and effective services to the residents of Kapenguria Municipality so as to improve their livelihood.

2. Statement of Compliance and Basis of Preparation

The financial statements have been prepared on a historical cost basis except for the measurement at re-valued amounts of certain items of property, plant and equipment, marketable securities and financial instruments at fair value, impaired assets at their estimated recoverable amounts, and actuarially determined liabilities at their present value. The preparation of financial statements in conformity with International Public Sector Accounting Standards (IPSAS) allows the use of estimates and assumptions. It also requires management to exercise judgment in the process of applying the *entity's* accounting policies. The areas involving a higher degree of judgment or complexity, or where assumptions and estimates are significant to the financial statements, are disclosed in Note 5 of these financial statements.

The financial statements have been prepared and presented in Kenya Shillings, which is the functional and reporting currency of the *entity*.

The financial statements have been prepared in accordance with the PFM Act, the State Corporations Act (*include any other applicable legislation*), and International Public Sector Accounting Standards (IPSAS). The accounting policies adopted have been consistently applied to all the periods presented.

Notes to financial statements continued

3. Significant Accounting Policies

a) Revenue recognition

i) Revenue from non-exchange transactions

Transfers from other government entities

Revenues from non-exchange transactions with other government entities are measured at fair value and recognized on obtaining control of the asset (*cash, goods, services and property*) if the transfer is free from conditions and it is probable that the economic benefits or service potential related to the asset will flow to the City/Municipality and can be measured reliably. To the extent that there is a related condition attached that would give rise to a liability to repay the amount, the amount is recorded in the statement of financial position and realised in the statement of financial performance over the useful life of the assets that has been acquired using such funds.

ii) Revenue from exchange transactions

Interest income

Interest income is accrued using the effective yield method. The effective yield discounts estimated future cash receipts through the expected life of the financial asset to that asset's net carrying amount. The method applies this yield to the principal outstanding to determine interest income for each period.

b) Budget information

The original budget for FY 2024/25 was approved by the County Assembly on 15 April 2024. Subsequent revisions or additional appropriations were made to the approved budget in accordance with specific approvals from the appropriate authorities. The additional appropriations are added to the original budget by the Municipality upon receiving the respective approvals in order to conclude the final budget. The Municipality's budget is prepared on a different basis to the actual income and expenditure disclosed in the financial statements. The financial statements are prepared on accrual basis using a classification based on the nature of expenses in the statement of financial performance, whereas the budget is prepared on a cash basis. The amounts in the financial statements were recast from the accrual basis to the cash basis and reclassified by presentation to be on the same basis as the approved budget. A comparison of budget and actual amounts, prepared on a comparable basis to the approved budget, is then presented in the statement of comparison of budget and actual amounts. A statement to reconcile the actual amounts on a comparable basis included in the statement of comparison of budget and actual amounts and the actuals as per the statement of financial performance has been presented under section xxx of these financial statements.

Significant Accounting Policies (Continued)

c) Property, plant and equipment

All property, plant and equipment are stated at cost less accumulated depreciation and impairment losses. Cost includes expenditure that is directly attributable to the acquisition of the items. When significant parts of property, plant and equipment are required to be replaced at intervals, the City/Municipality recognizes such parts as individual assets with specific useful lives and depreciates them accordingly. Likewise, when a major inspection is performed, its cost is recognized in the carrying amount of the plant and equipment as a replacement if the recognition criteria are satisfied. All other repair and maintenance costs are recognized in surplus or deficit as incurred. Where an asset is acquired in a non-exchange transaction for nil or nominal consideration the asset is initially measured at its fair value.

d) Intangible assets

Intangible assets acquired separately are initially recognized at cost. The cost of intangible assets acquired in a non-exchange transaction is their fair value at the date of the exchange. Following initial recognition, intangible assets are carried at cost less any accumulated amortization and accumulated impairment losses. Internally generated intangible assets, excluding capitalized development costs, are not capitalized and expenditure is reflected in surplus or deficit in the period in which the expenditure is incurred. The useful life of the intangible assets is assessed as either finite or indefinite.

e) Financial instruments

IPSAS 41 addresses the classification, measurement and de-recognition of financial assets and financial liabilities, introduces new rules for hedge accounting and a new impairment model for financial assets. The entity does not have any hedge relationships and therefore the new hedge accounting rules have no impact on the Company's financial statements.

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity. At initial recognition, the entity measures a financial asset or financial liability at its fair value plus or minus, in the case of a financial asset or financial liability not at fair value through surplus or deficit, transaction costs that are directly attributable to the acquisition or issue of the financial asset or financial liability.

Significant Accounting Policies (Continued)

Financial assets

Classification of financial assets

The entity classifies its financial assets as subsequently measured at amortised cost, fair value through net assets/ equity or fair value through surplus and deficit on the basis of both the entity's management model for financial assets and the contractual cash flow characteristics of the financial asset. A financial asset is measured at amortized cost when the financial asset is held within a management model whose objective is to hold financial assets in order to collect contractual cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal outstanding. A financial asset is measured at fair value through net assets/ equity if it is held within the management model whose objective is achieved by both collecting contractual cashflows and selling financial assets and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding. A financial asset shall be measured at fair value through surplus or deficit unless it is measured at amortized cost or fair value through net assets/ equity unless an entity has made irrevocable election at initial recognition for particular investments in equity instruments.

Subsequent measurement

Based on the business model and the cash flow characteristics, the entity classifies its financial assets into amortized cost or fair value categories for financial instruments. Movements in fair value are presented in either surplus or deficit or through net assets/ equity subject to certain criteria being met.

Amortized cost

Financial assets that are held for collection of contractual cash flows where those cash flows represent solely payments of principal and interest, and that are not designated at fair value through surplus or deficit, are measured at amortized cost. A gain or loss on an instrument that is subsequently measured at amortized cost and is not part of a hedging relationship is recognized in profit or loss when the asset is de-recognized or impaired. Interest income from these financial assets is included in finance income using the effective interest rate method.

Significant Accounting Policies (Continued)

Fair value through net assets/ equity

Financial assets that are held for collection of contractual cash flows and for selling the financial assets, where the assets' cash flows represent solely payments of principal and interest, are measured at fair value through net assets/ equity. Movements in the carrying amount are taken through net assets, except for the recognition of impairment gains or losses, interest revenue and foreign exchange gains and losses which are recognized in surplus/deficit. Interest income from these financial assets is included in finance income using the effective interest rate method.

Fair value through surplus or deficit

Financial assets that do not meet the criteria for amortized cost or fair value through net assets/ equity are measured at fair value through surplus or deficit. A business model where the entity manages financial assets with the objective of realizing cash flows through solely the sale of the assets would result in a fair value through surplus or deficit model.

Trade and other receivables

Trade and other receivables are recognized at fair values less allowances for any uncollectible amounts. Trade and other receivables are assessed for impairment on a continuing basis. An estimate is made of doubtful receivables based on a review of all outstanding amounts at the year end.

Impairment

The entity assesses, on a forward-looking basis, the expected credit loss ('ECL') associated with its financial assets carried at amortized cost and fair value through net assets/equity. The entity recognizes a loss allowance for such losses at each reporting date. Critical estimates and significant judgments made by management in determining the expected credit loss (ECL) are set out in *Note xx*.

Financial liabilities

Classification

The entity classifies its liabilities as subsequently measured at amortized cost except for financial liabilities measured through profit or loss.

Significant Accounting Policies (Continued)

f) Inventories

Inventory is measured at cost upon initial recognition. To the extent that inventory was received through non-exchange transactions (for no cost or for a nominal cost), the cost of the inventory is its fair value at the date of acquisition. Costs incurred in bringing each product to its present location and conditions are accounted for, as follows:

- Raw materials: purchase cost using the weighted average cost method
- Finished goods and work in progress: cost of direct materials and labour and a proportion of manufacturing overheads based on the normal operating capacity, but excluding borrowing costs

After initial recognition, inventory is measured at the lower of cost and net realizable value. However, to the extent that a class of inventory is distributed or deployed at no charge or for a nominal charge, that class of inventory is measured at the lower of cost and current replacement cost. Net realizable value is the estimated selling price in the ordinary course of operations, less the estimated costs of completion and the estimated costs necessary to make the sale, exchange, or distribution. Inventories are recognized as an expense when deployed for utilization or consumption in the ordinary course of operations of the City/Municipality.

g) Provisions

Provisions are recognized when the City/Municipality has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits or service potential will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. Where the City/Municipality expects some or all of a provision to be reimbursed, for example, under an insurance contract, the reimbursement is recognized as a separate asset only when the reimbursement is virtually certain. The expense relating to any provision is presented in the statement of financial performance net of any reimbursement.

h) Social Benefits

Social benefits are cash transfers provided to i) specific individuals and / or households that meet the eligibility criteria, ii) mitigate the effects of social risks and iii) Address the need of society as a whole. The entity recognises a social benefit as an expense for the social benefit scheme at the same time that it recognises a liability. The liability for the social benefit scheme is measured at the best estimate of the cost (the social benefit payments) that the entity will incur in fulfilling the present obligations represented by the liability.

Significant Accounting Policies (Continued)

i) Contingent liabilities

The Municipality does not recognize a contingent liability, but discloses details of any contingencies in the notes to the financial statements unless the possibility of an outflow of resources embodying economic benefits or service potential is remote

j) Contingent assets

The Municipality does not recognize a contingent asset but discloses details of a possible asset whose existence is contingent on the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the City/Municipality in the notes to the financial statements. Contingent assets are assessed continually to ensure that developments are appropriately reflected in the financial statements. If it has become virtually certain that an inflow of economic benefits or service potential will arise and the asset's value can be measured reliably, the asset and the related revenue are recognized in the financial statements of the period in which the change occurs.

k) Nature and purpose of reserves

The Municipality creates and maintains reserves in terms of specific requirements.

l) Changes in accounting policies and estimates

The Municipality recognizes the effects of changes in accounting policy retrospectively. The effects of changes in accounting policy are applied prospectively if retrospective application is impractical.

m) Employee benefits – Retirement benefit plans

The City/Municipality provides retirement benefits for its employees and directors. Defined contribution plans are post-employment benefit plans under which the City/Municipality pays fixed contributions into a separate fund and will have no legal or constructive obligation to pay further contributions if the City/Municipality does not hold sufficient assets to pay all employee benefits relating to employee service in the current and prior periods. The contributions to scheme obligations for the payment of retirement benefits are charged against income in the period in which they become payable. Defined benefit plans are post-employment benefit plans other than defined-contribution plans. The defined benefits are actuarially valued tri-annually on the projected unit credit method basis. Deficits identified are recovered through lump sum payments or increased future contributions on proportional basis to all participating employers. The contributions and lump sum payments reduce the post-employment benefit obligation.

Significant Accounting Policies (Continued)

n) Foreign currency transactions

Transactions in foreign currencies are initially accounted for at the ruling rate of exchange on the date of the transaction. Trade creditors or debtors denominated in foreign currency are reported in the statement of financial position reporting date by applying the exchange rate on that date. Exchange differences arising from the settlement of creditors, or from the reporting of creditors at rates different from those at which they were initially recorded during the period, are recognized as income or expenses in the period in which they arise.

o) Borrowing costs

Borrowing costs are capitalized against qualifying assets as part of property, plant and equipment. Such borrowing costs are capitalized over the period during which the asset is being acquired or constructed and borrowings have been incurred. Capitalization ceases when construction of the asset is complete. Further borrowing costs are charged to the statement of financial performance.

p) Related parties

The City/Municipality regards a related party as a person or an entity with the ability to exert control individually or jointly, or to exercise significant influence over the City/Municipality, or vice versa. Members of key management are regarded as related parties and comprise the Board members, the City/Municipality Managers and City/Municipality Accountant.

q) Cash and cash equivalents

Cash and cash equivalents comprise cash on hand and cash at bank, short-term deposits on call and highly liquid investments with an original maturity of three months or less, which are readily convertible to known amounts of cash and are subject to insignificant risk of changes in value. Bank account balances include amounts held at various commercial banks at the end of the financial period. For the purposes of these financial statements, cash and cash equivalents also include short-term cash imprests and advances to authorised public officers and/or institutions which were not surrendered or accounted for at the end of the financial period.

r) Comparative figures

Where necessary comparative figures for the previous financial period have been amended or reconfigured to conform to the required changes in presentation.

Significant Accounting Policies (Continued)

s) Events after the reporting period

Events after the reporting date are those events, both favourable and unfavourable, that occur between the reporting date and the date when the financial statements are authorized for issue. Two types of events can be identified:

- (a) Those that provide evidence of conditions that existed at the reporting date (adjusting events after the reporting date); and
- (b) Those that are indicative of conditions that arose after the reporting date (*non-adjusting events after the reporting date*).

The City/Municipality should indicate whether there are material adjusting and non- adjusting events after the reporting period.

t) Currency

The financial statements are presented in Kenya Shillings (Kshs) with the values being rounded off to the nearest shilling.

Significant accounting policies (continued)

4. Significant judgments and sources of estimation uncertainty

The preparation of the City/Municipality's financial statements in conformity with IPSAS requires management to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the disclosure of contingent liabilities, at the end of the reporting period. However, uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of the asset or liability affected in future periods.

State all judgements, estimates and assumptions made e.g.

Estimates and assumptions

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial period, are described below. The City/Municipality based its assumptions and estimates on parameters available when the consolidated financial statements were prepared. However, existing circumstances and assumptions about future developments may change due to market changes or circumstances arising beyond the control of the City/Municipality. Such changes are reflected in the assumptions when they occur.

Useful lives and residual values

The useful lives and residual values of assets are assessed using the following indicators to inform potential future use and value from disposal:

- i) The condition of the asset based on the assessment of experts employed by the City/Municipality.
- ii) The nature of the asset, its susceptibility and adaptability to changes in technology and processes.
- iii) The nature of the processes in which the asset is deployed.
- iv) Availability of funds to replace the asset.
- v) Changes in the market in relation to the asset.
